New Beginnings

A Channeled Message on Renewal, Redirection, and Galactic Understanding (February 5, 1999)

OVERVIEW

This 28-minute channeled communication marks a turning point in the beings' interaction with the medium. After a long period of diversion from their original purpose, they are returning to their foundational mission: revealing the nature of outer galactic spheres, explaining who and what they represent, and why they are present on Earth. This is presented as a 'new beginning'—a fresh start after necessary but temporary digressions.

CENTRAL THEMES

1. Return to Golden Pathway
The beings describe having temporarily diverted from their original purpose, but 'diversions have eradicated themselves.' They are now laying 'on the golden pathway' again. This represents a return to their fundamental mission with renewed clarity and purpose.

2. Patience and Continuity
The beings emphasize their patience with the medium's development. 'Resignations only come from your side, resignations do not come from us.' They have waited through half a lifetime of this person's journey and remain committed to the connection.

3. Spiritual vs. Cosmic Purpose
The beings acknowledge that human minds tend to pursue spiritual pathways, which is natural but has diverted attention from understanding the cosmic purpose they represent. Their original intention was to reveal outer galactic spheres and explain their true nature and presence.

4. Truth Recognition Despite Form
'The independence of all fruition and truth is not who represents it, but what it represents.' This emphasizes that truth transcends the messenger or personality—focus should be on the message itself.

5. Progressive Understanding Through Questioning
The beings propose a method of progressive revelation: 'Whereas one questions, one receives an answer which will receive a further question. This in itself is the perception of the chasing of truth.' Understanding deepens through dialogue and inquiry.

6. Opening Doors of Understanding
They use the metaphor of opening doors: 'We shall open a door each time, yes? And progress through the corridors until we need no doorway.' This represents gradual expansion of consciousness until unlimited understanding is achieved.

7. Mind Re-impregnation
The beings will 're-impregnate' minds with knowledge and guidance, helping people ask questions about things they cannot consciously know, yet reaping 'the rich reward of the answer.' This is a form of guided revelation.

8. Cosmic Life is Vast and Magnificent
Humans have no barriers to interacting with different spheres of life using 'interacting energy.' Life itself is 'enormous and vast, far greater than you would envisage.' There are thousands of spheres similar to Earth.

9. Light Cannot be Changed or Manipulated
The beings warn: 'When he changes light, you cannot change light. You can be part of it or you can be in the dark, you cannot change it.' Attempting to manipulate universal laws brings 'disaster.' Light is immutable truth.

10. Revelation of Personalities and Forms
The beings indicate they are now moving into 'yet another form' which allows them to 'indicate to you the trueness of who and what we are.' Personalities will be revealed (Chukuja, Shambhala, Chokasa, Malik) as the group progresses.

KEY MESSAGES

Diversification Was Necessary: While the group pursued spiritual understanding, this wasn't wrong—it was natural given Earth's energy. However, it created distance from the primary mission.

No Blame, Only Understanding: The medium is not blamed for the diversification. They followed the planet's spiritual momentum, and this actually created opportunities for the beings to work with others.

Spiritual Guides Are Real: Those spiritual personalities the group remembers with 'great adulation and love' are real beings who exist in galactic fields. They cannot yet be fully revealed without causing misunderstanding.

Truth is Progressive: Understanding cannot come all at once. It must unfold door by door, question by question, progressively expanding consciousness.

Life Beyond Earth: There are thousands of spheres similar to Earth where life thrives. Cosmic existence is infinitely more complex than human understanding suggests.

Immutable Cosmic Laws: Certain laws (like the nature of light and energy) cannot be changed or manipulated without catastrophic consequences.

CLOSING VISION

The beings close by emphasizing that life's magnificence is yet to be revealed. Humans 'adorn themselves as if they are life itself' but are blind to greater realities. They will be taken on 'journeys and adventures the likes of which you have never experienced,' learning how their mind evolves and how their life intertwines with countless others. Through these experiences, humans will understand 'the perfect functions of what you term the God light'—the universal principle operating through all existence from starving children to wealthy individuals. The remaining spiritual kingdoms will fade as reality unfolds and people advance toward understanding authentic divine light and energy.

KEY TAKEAWAY

This message represents a pivotal moment in the cosmic communication with humanity. After necessary spiritual diversions, the beings are reasserting their primary mission: revealing the true nature of outer galactic reality, introducing higher personalities, and progressively expanding human understanding of cosmic existence. The communication style will be dialogical—questions will guide revelation. Understanding will unfold gradually like opening doors through expanding corridors. Humanity is invited to recognize that spiritual understanding, while valuable, is a stepping stone toward comprehending authentic cosmic reality where millions of worlds exist and interact through universal principles that cannot be broken or manipulated. The future promises adventures and revelations that will fundamentally transform human perception of existence and their place within it.
