ID and Mankind

A Channeled Message on Identity, Thought, and Cosmic Evolution (March 26, 1999)

OVERVIEW

This 40-minute channeled communication explores the concept of 'ID' (Identity Consciousness) as the fundamental unit of existence throughout the universe. The beings discuss humanity's current crisis of destructive thought patterns, the limitations on their intervention, cosmic re-seeding efforts, and the infinite nature of consciousness and parallel realities. Central to the message is the immense power of unified human thought and the cosmic mystery of identity.

CORE CONCEPTS & MAJOR THEMES

1. ID as Cosmic Unit of Consciousness
The entities use 'ID' to refer to individual identity/consciousness at every scale of existence. In the 'eternal fields of life' there are 'microscopic ids'—each being contains countless IDs within it. Each ID is conscious, individual yet interconnected. The universe is essentially composed of trillions upon trillions of discrete yet unified identities.

2. The Crisis of Destructive Thought
Humanity is experiencing an escalation of violent, evil, and destructive thoughts that unify into collective negative action. Each individual thinks they are right, yet there's no 'give way'—no compromise or flexibility. War, destruction, and misdeed continually escalate. This saddens the beings and motivates their intervention.

3. Non-Interference Law
The beings cannot directly interfere with planetary structures despite observing destructive behavior. This is 'the law of life'—each insurrection (situation/consciousness) must develop and fulfill its own goal. Even though it causes them sadness, they must allow humanity to face consequences of its choices.

4. Re-sporing as Solution
To address humanity's destructive tendencies without directly interfering, the 'elder ones' have chosen to 're-spore' Earth—introducing new consciousness from distant spheres. These new elements and differentials are meant to help humans find 'rational behaviour' and intermediate with their 'greatest self'.

5. Religion as Human Segregation
Religion is presented as a human invention to separate and segregate—dividing what humans

accept from what they reject. True spiritual understanding transcends religious boundaries and reveals 'the purity of science' (spiritual science). Those beyond religious concepts discover authentic truth.

6. The Power of Unified Thought
This is emphasized repeatedly: if enough humans unify their consciousness in pure, positive thought, nothing can destroy that force. Conversely, if humans unify in evil intent, evil will manifest. Thought is a 'very strange weapon' that humans don't understand.

7. Abbreviated Thinking Creates Abbreviated Consciousness
Humans abbreviate everything, including their thinking. Thoughts that aren't 'thought through' cause present-day troubles. People assume they've thought deeply when they haven't. This abbreviated, partial consciousness creates problems.

8. The Secret Power of Thought's ID
Each thought contains an 'id' within it—a conscious identity. The secret of thought is the ID it contains. Every myriad spec (infinitesimal unit) contains an ID. Understanding how many myriads have been purified begins to reveal the concept of God.

9. Infinite Parallel Worlds
Each identifiable energy has the frequency and power to create entire worlds within itself. Each of these worlds can become as real as the current physical world. There are countless parallel dominions beyond human vision, each with its own realities, beings, and dimensions.

10. Universal Expansion and Divine Complexity
The beings point out how minuscule human universities are compared to cosmic reality. The concept that each fraction of one ID can create worlds within worlds, and all those worlds are equally real, reveals the staggering complexity and expansion of existence.

KEY CHALLENGES DISCUSSED

War and Destruction: The beings observe with sadness that as civilization progresses, destructive capability increases proportionally. Wars occur repeatedly. Eventually 'this place shall cease to be'—not in the way they wish.

Free Will vs. Intervention: The entities struggle with the paradox that they witness destruction yet cannot interfere due to cosmic law. Each being/civilization must develop according to its own choices. This is the law that governs all life.

Evil Unification: When individual thoughts of people unify around evil intentions, those evil acts manifest physically. The beings must observe this and wait, allowing humanity to experience natural

consequences.

Religious Fragmentation: Religion has created separation among humans who should be unified in understanding. This fragmentation weakens the power of collective human consciousness.

Abbreviated Understanding: Humans don't fully think through their ideas before speaking and acting. This abbreviated consciousness leads to problems because thoughts are powerful forces that manifest reality.

THE BEINGS' STRATEGY FOR HUMANITY'S FUTURE

The beings explain they are re-sporing Earth with new consciousness elements from distant spheres. This infusion of new awareness and differentials is designed to help humanity find rational behavior and connect to their greatest self. The observation will be 'conclusive' as this interspersion begins to take effect. If enough humans can unify their consciousness around pure, peaceful, constructive thoughts, it could mark 'the beginning of the end of combative excuses.' However, they emphasize that future unfolding will be shown 'from future past' and they will continue to wait in anticipation for humanity's choices.

FASCINATING DISTINCTIONS MADE

ID vs. Thought: The entities note that kingdoms are being lost because humans lose the ID (the consciousness/identity element). A thought retains the ID within it—that's what makes it alive and capable of creating reality.

Color Sequence Perception: The beings perceive thoughts first as 'color sequences' before manifesting as sound/words. If the color doesn't look right, they don't express it. Humans reverse this—they speak thoughts without perceiving their 'color' first.

Full vs. Abbreviated Consciousness: The entities emphasize that Nathaniel (referenced as a spiritual principle) requires complete, fully-thought-through consciousness. Abbreviation of thinking produces abbreviated consciousness and incomplete actions.

Emissaries of Many Forms: The beings exist in a million different forms with expansion within themselves. Yet despite this multiplicity, they maintain unified consciousness and purpose.

CLOSING SPIRITUAL MESSAGES

The recording ends with personal messages from spiritual beings/guides, including one identifying as Nathaniel. They send greetings from other beings known to the group members (Isaac, Osiris, Isis, Colette Jones/Aya, Gordon, and Maya). These messages suggest that deceased loved ones and spiritual guides remain aware and connected from different 'plateaus' (dimensions/realms). They are 'home' which is why they have different names—indicating they've returned to their place of origin. The beings close by leaving the group with 'happiness' and expressing pleasure at the exchange.

KEY TAKEAWAY

This message presents a cosmic perspective on humanity's current crisis. Destructive thought patterns are escalating, yet the universe cannot violate free will by forcefully correcting human behavior. Instead, higher consciousness is introducing new awareness elements through 're-sporing' to help humans elevate their thinking. The power of unified human consciousness is the key to transformation—if enough people genuinely unify around pure, peaceful thoughts, nothing can stop that force. The universe is infinitely complex, with trillions of individual identities (IDs) existing at every scale, each capable of creating their own worlds. Humans must move beyond abbreviated, incomplete thinking and truly understand the power of thought to create reality. Those who have passed on remain eternally connected through higher dimensions. The species' future depends on whether humans can overcome their tribal thinking (religion, nationalism, etc.) and unify consciousness around peace, rationality, and connection to their 'greatest self.'

Recording Date: March 26, 1999 | Duration: ~40 minutes
Summary Created: August 27, 2026
