Knowledge and Religion

A Channeled Message on Purity of Knowledge vs. Religious Interpretation (April 2, 1999)

OVERVIEW

This 45-minute message distinguishes between pure knowledge and tainted interpretation, explaining how religion obscures cosmic truth. The beings discuss how knowledge is filtered through individual consciousness frequencies and how true knowledge only emerges through direct cosmic connection beyond religious frameworks.

CORE CONCEPTS

Knowledge vs. Interpretation: Pure knowledge differs from interpretations of wisdom. Much 'knowledge' on Earth is tainted by others' observations, creating interpretations rather than pure truth.

Frequency-Dependent Knowledge: Knowledge exists at different frequency levels. What humans perceive as knowledge is actually the portion their consciousness frequency can access and understand.

Religion as Filter: Religious systems filter knowledge through belief structures, creating sectarian truth rather than universal knowledge. Religion creates divisions rather than unity.

Multiple Parallel Frequencies: There are many dimensional frequencies, each with its own knowledge equilibrium. Different dimensions maintain their own wisdom patterns appropriate to their vibrational level.

Environmental Differentials: Knowledge is relative to environmental circumstances. What's true knowledge in one dimension may not apply equally in another.

UFO Phenomena and Truth: There are 'vast indications' related to UFO and non-terrestrial entities, but humans possess only interpretations, not the sequential vibrations of knowledge itself.

Speculative vs. Equilibrium Knowledge: Earth knowledge is speculative—varying by individual perception. Other dimensions possess equilibrium knowledge—unified understanding across consciousness.

Sequential Vibrations: Ultimate knowledge comes through sequential vibrations accessible only in outer reaches of life beyond material dimension.

Parent Soul Nature: The channeling being is described as having 'parent soul' nature with retention of energy fields—a guide consciousness overseeing development.

KEY TAKEAWAY

Pure knowledge transcends religion and frequency interpretation. Humans possess fragments filtered through individual consciousness limits. Genuine cosmic knowledge awaits those who transcend religious frameworks and expand consciousness frequency. Truth is unified and equilibrated in higher dimensions but fragmented and speculative on Earth.
