Africans and Atlanteans

A Channeled Message on Consciousness Lineages, Ancient History, and Dimensional Coordinates (September 17, 1999)

OVERVIEW

This 48-minute message explores the consciousness lineages of African peoples and their connection to Atlantean civilization. The beings explain how life emerges from intersecting parallel dimensions and how ancient peoples possessed knowledge later lost.

CORE CONCEPTS

Unified Embryo Consciousness: When beings come together in unity, they function as 'one embryo collectively'—unified consciousness with pure coordination.

Parallel Intersections Create Life: Life emerges where multiple parallel dimensions intersect, creating 'words' and evidence of divine coordination.

Purification Through Unity: When coordination is pure, relationship becomes pure, and information received is pure and refined.

Sectionalization of Life: Parallels/dimensions are sectionalization creating different aspects of existence that must coordinate properly.

African Consciousness Lineage: African peoples carry consciousness lineages connected to advanced ancient civilizations with specific spiritual frequencies.

Atlantean Legacy: Atlanteans possessed knowledge of dimensional intersection and consciousness manipulation now largely lost.

Genetic Memory: Consciousness imprints in genetic structures carry memory of advanced knowledge across generations.

Earth as Staging Ground: Different peoples represent different frequency experiments—Africa, Asia, Americas each have specific consciousness purposes.

Refinement Through Distance: Moving away from dense material Earth, consciousness becomes more refined and fragrant (lighter).

Divinized Coordinates: All coordinates are in lineage with divinity and all life—nothing exists outside divine coordination.

KEY TAKEAWAY

African and Atlantean peoples carry advanced consciousness lineages from dimensional intersection points. Ancient civilizations possessed knowledge of parallel dimensions and consciousness manipulation. Genetic memory preserves ancient knowledge across generations. All peoples on Earth represent frequency experiments coordinated by divine consciousness. Consciousness refinement occurs as one moves away from dense material focus. History is not linear but cyclical, with consciousness returning to knowledge through remembrance and activation of genetic memory.
