Troylants Envelope Us

A Channeled Message Introducing Troylant Beings and Protective Consciousness (October 3, 1999)

OVERVIEW

This 45-minute message introduces the Troylants—advanced protective beings who exist in parallel dimensions surrounding Earth. They explain their role as guardians and their methods of working with human consciousness.

CORE CONCEPTS

Troylants Identity: Troylants are advanced dimensional beings of great power and intelligence existing in parallel structures surrounding Earth.

Protective Function: Their primary role is protection and guardianship of Earth and humanity's development.

Multi-Dimensional Presence: Troylants exist simultaneously in multiple dimensions, able to monitor and respond to events across planes.

Energy Envelope: Troylants create energetic envelopes or protective fields around individuals and the planet.

Consciousness Interference Prevention: They work to prevent negative consciousness from interfering with positive development.

Collaborative with Other Beings: Troylants work alongside doctors of the parallels and other advanced beings in coordinated service.

Limited Visibility: Humans rarely perceive Troylants directly; their work occurs in invisible dimensions.

Evolutionary Support: They support human evolution by removing impediments and creating conditions favorable to growth.

Non-Interference Law Respected: Despite protective role, Troylants honor free will and don't forcefully prevent negative choices.

Long-Term Presence: Troylants have existed in relation to Earth far longer than human civilization—ancient guardians.

KEY TAKEAWAY

Troylants are advanced protective beings of immense power surrounding Earth in invisible dimensions. They serve as guardians supporting human evolution. Their presence and protection work occurs beyond human perception. Despite their power, they respect free will and cannot force correction. Humans are never as alone as they appear—surrounded by caring protective consciousness.
